Subject: Community Update – Irrigation & Drought Conditions

Date: May 1, 2026

Dear Village of Bonita Residents,

We want to provide a brief update regarding irrigation and current drought conditions impacting our community.

Due to newly installed landscaping at the clubhouse and pool area, that specific irrigation system has been placed on a **daily watering schedule** to protect and sustain these recent plant investments.

At the same time, our community remains on a **restricted watering schedule** overall due to **low water levels in our lakes**. Preserving these levels is critical to maintaining the health of our shared environment and infrastructure.

To help address this challenge, the Board is currently **exploring the activation of a well on the VOB property**. We are in the process of obtaining quotes and evaluating feasibility, with the goal of providing additional irrigation support.

Until drought conditions improve and lake levels recover, we will continue to operate under the **limited watering schedule**.

As a reminder, residents who wish to water individual plants or landscaping may do so using **Bonita Utilities**, which is available to all homeowners and billed individually based on usage.

We appreciate your understanding and cooperation as we work to protect and preserve our community resources.

Sincerely,

The Village of Bonita Board
